

Mironichev Roman Alexandrovich, Delivery Manager; Senior Project; Head Of PMO

✉ tocryptopostman@gmail.com 📍 romwag 🔗 LinkedIn 🐙 GitHub 🔗 <https://romariobro.github.io/projectportfolio>

SUMMARY

Senior delivery leader focused on fixing complex product execution environments and turning fragmented teams into predictable delivery systems. 15+ years working across fintech payments, crypto platforms, gaming ecosystems and high-load digital products. Known for recovering broken delivery processes, structuring cross-team execution, and shipping complex platforms used by millions of users.

EXPERIENCE

Independent Consulting & AI Tools Development

Jun 2025 - Present

Selfmade

May 2025 — Present

Focused on family responsibilities while continuing professional development and working on independent projects.

- Developed an **AI-based YouTube summarization bot** using YouTube API and LLM tools to accelerate research and knowledge analysis
- Experimented with AI-assisted workflows for product research, prototyping and information processing
- Delivered marketing and digital projects including **brand identity, websites and traffic acquisition campaigns**
- Advised early-stage startups on product structure and delivery processes

Project Manager

Nov 2024 - May 2025

Sberbank Group / AO 'Rasschetnye Resheniya'

Led delivery of a transport payment processing and pre-processing platform used across large urban transport networks. The system processes payments from terminals and online channels and operates as part of a multi-system ecosystem involving banks, transport operators and regulatory requirements.

- Platform scale: ~100M payment transactions per day across terminals and online channels.
- Transport ecosystem serving ~40M users.
- Coordinated delivery across ~12 teams working with 10–15 interconnected internal systems and ~10 external partner systems.
- Improved delivery performance from 20% to 70% of releases delivered within committed timelines.
- Delivered 14 production releases during project cycle.
- Launched 10+ product features improving payment speed and passenger experience.
- Managed full lifecycle delivery from business request to production release with a 40+ person engineering team.
- Worked with terminal hardware integration, pilot deployments and scaling of transport payment infrastructure.
